Exchange.

# SO WHAT CAN YOU DO?

- 1 Keep developing** - It doesn't matter where you are in your career: This means qualifications, certifications, further learning, but look for the accredited ones!
- 2 Have a plan - Where do you want to go?** - Remember it is up to you to identify what competencies you need to develop to be able to get there. Plan your career how you plan everything else in life (your holiday, your next house, your next car,...)
- 3 Identify the competencies required for your next milestone** - What do you need to do now to get there tomorrow?
- 4 Don't be afraid of change or challenges.** If you need to sit an exam to move up – prepare for it, and give it a deadline.

## SO WHAT CAN YOU DO?

---

- 5 **Get a mentor** - Successful people have more than one!
- 6 **Surround yourself by clever, competent people** - connect – engage – collaborate
- 7 **Stop blaming others for not allowing you to succeed** – it is only down to you
- 8 **Avoid comparing yourself with others** – unless it inspires you to achieve more and more
- 9 **Remember it is not ‘luck’** – people work very hard to develop their careers. How is your work ethics? Do you have the discipline?
- 10 **Consider developing as a brand - Are you a brand or branded?** – create your own expertise (competencies) that fit with the market, and not just a company\*

\*P Zink, 'The New Rules Of Career Success And How To Make Yourself Indispensable In 2021', Forbes. March, 2021.

## IN SUMMARY

You do need to be  
competent to have a  
successful career –  
**technically competent  
and more!**
